SHIVAM MISHRA

Senior Software Engineer | Immediate Joiner

Delhi, India | +91 6392384273 | shivammishr16@gmail.com | Portfolio

SUMMARY

Senior Software Engineer with 4+ years of experience building scalable web applications and microservices using React, TypeScript, Node.js, and NestJS. Specialized in REST API design, performance optimization, and CI/CD automation. Proven track record of delivering reliable systems for global platforms with a focus on system scalability and production-grade engineering.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Redux Toolkit, Material UI, Ant Design, HTML, CSS
Backend: Node.js, NestJS, Express.js, REST APIs, Microservices Architecture, Domain-Driven Design
Databases: PostgreSQL, MySQL, MongoDB, Prisma, Sequelize, TypeORM
Testing: Jest, Playwright, Storybook, Supertest, Cucumber, E2E & Integration Testing
DevOps & Cloud: Docker, AWS, AWS Amplify, GitHub Actions, CI/CD, Git

PROFESSIONAL EXPERIENCE

Deel
Remote – San Francisco, USA
Software Engineer — **Aug 2023 – Present**

- Enhanced job portal and applicant lifecycle features using React and TypeScript, improving recruiter efficiency.
- Designed scalable REST APIs using NestJS, following Domain-Driven Design and microservices architecture.
- Integrated Sequelize ORM with PostgreSQL/MySQL and managed database schema evolution through migrations.
- Increased backend E2E test coverage to 100% using Jest and Supertest, reducing production bugs by 25%.
- Refactored backend services with mocked dependencies, improving CI reliability and reducing test execution time.
- Upgraded frontend E2E framework from WebdriverIO v6 to v9, improving test stability and maintainability.
- Automated CI/CD pipelines with GitHub Actions, reducing deployment time by 35%.
- Optimized five NestJS microservices for employment, payroll sync, and user services.

Wakencode Technologies Pvt. Ltd
Gurugram, India
Frontend Engineer — **Aug 2021 – Aug 2023**

- Developed responsive user interfaces using React, Material UI, and Ant Design for enterprise web applications.
- Managed application state using Redux Toolkit and integrated backend services via REST APIs using Axios.
- Implemented complex forms with Formik and Yup validation, improving reliability of user data submissions.
- Documented reusable UI components with Storybook, improving team collaboration and frontend consistency.
- Led the upgrade of a Scheduler application from v0 to v1, improving performance, maintainability, and UI stability.

PROJECTS

Dairy Farm Management System
Next.js, NestJS, Prisma, PostgreSQL, React Native (Expo)

- Built scalable APIs and database models for managing livestock and farm activities.
- Optimized frontend performance through code splitting, lazy loading, memoization, and bundle optimization.
- Improved Lighthouse performance score from ~40% to ~80%, significantly reducing page load times.

Spacey Mars Mission
React, TypeScript, Three.js

- Developed interactive 3D simulations of Mars gravity using Three.js.

EDUCATION

Bachelor of Computer Applications (BCA)
2018 – 2021
Asian School of Business, Noida

KEY ACHIEVEMENTS

- Improved React application performance from 40% to 80% Lighthouse score through frontend optimization.
- Achieved 100% backend E2E test coverage, significantly reducing production bugs.
- Automated CI/CD workflows that reduced deployment time by 35%.
- Built and maintained microservices used in a global payroll platform operating across 150+ countries.
